

VITRUS

The most advanced
Wine Cellar Enclosure
combining superior performance
with sleek design

by Focus Wine Cellars
www.focuswinecellars.com

With 20+ years in-depth experience in designing and building bespoke wine cellars and wine cabinets, Focus Wine Cellars (FWC) has created the most advanced glass wine cellar enclosure **VITRUS** .

Unlike the many others being marketed as “glass wine cellars” which are far from providing proper storage conditions for wine due to the lack of necessary insulation features,

VITRUS represents an advanced dimension of wine storage, a safe harbor for wine lovers.

Excellent thermal insulation, ultimate air-tightness

Heated profiles avoiding condensation even in humid regions

Blocks harmful effects of light

Narrow frames maximizing transparency

Self-contained cooling unit without remote condenser eliminates refrigerant piping and drain connection

Fully customizable and configurable

Comes with many optional add-ons

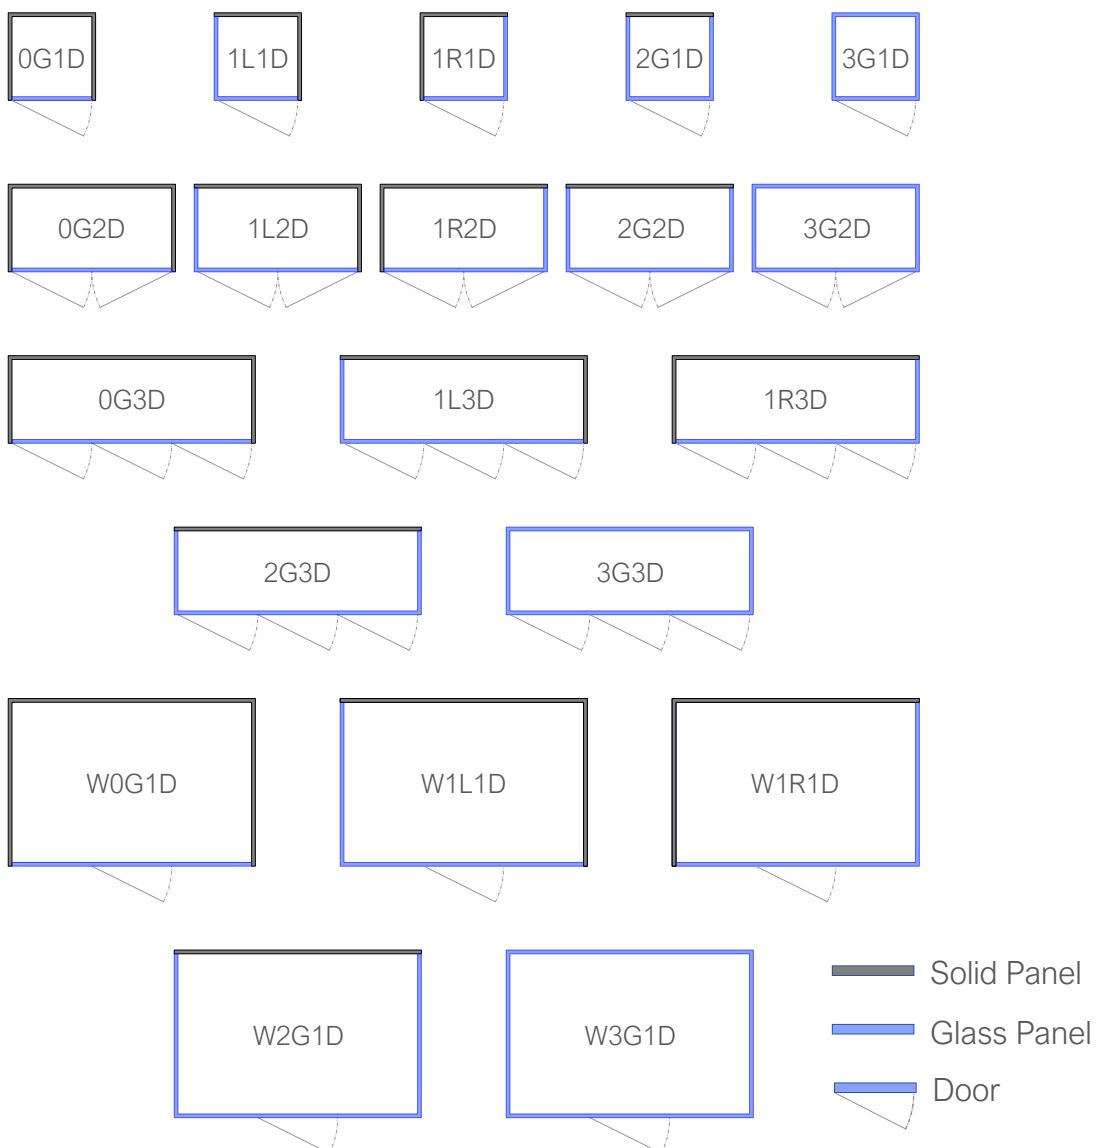

DIY friendly, easy installation

Endless Configurations

VITRUS offers great design flexibility thanks to its endless configuration possibilities. The enclosure can have glazing on one, two, three or all four sides. It can be built-in or free-standing with single, double or triple door. It goes without saying that the dimensions are also customizable according to your need.

Various Racking Systems
